

## Vehicles

The Lifeline fleet is currently comprised of 12 fully equipped Emergency Ambulances and two medical cars. Specialist Vehicles

Lifeline currently has two CEN compliant A&E Voyager ambulances, available for HDU, ICU, CCU and Neo-natal transfers. Lifeline also has two other vehicles equipped with stretcher lifts. Quality Control

All vehicles are subjected to a pre-shift inspection, which includes basic checks such as levels, tyres, glass/mirrors, bodywork, etc.

A check list is also completed by the ongoing crew confirming that the vehicle has its required level of equipment and supplies on board. Current Vehicles (Nov 2004) Registration Description  
04 KE 8287 CEN Compliant Ford Transit Voyager – with stretcher lift (1 str.)
